

TEAM INSOMNIACS PRESENTS

SECURE PASS

PASSWORD MANAGER

TEAM MEMBERS:

- **KARTIKEY**
- **NABEEL**
- **VISHAL**
- **SHIV**

PROJECT DISCRIPTION

- Passwords are difficult to remember
- users have many accounts that require passwords
- This causes users to choose a memorable but weak password and then reuse them

PROJECT DISCRIPTION

- This creates major security problems
- Users to only need to remember one password
- Which they can use to access all their passwords

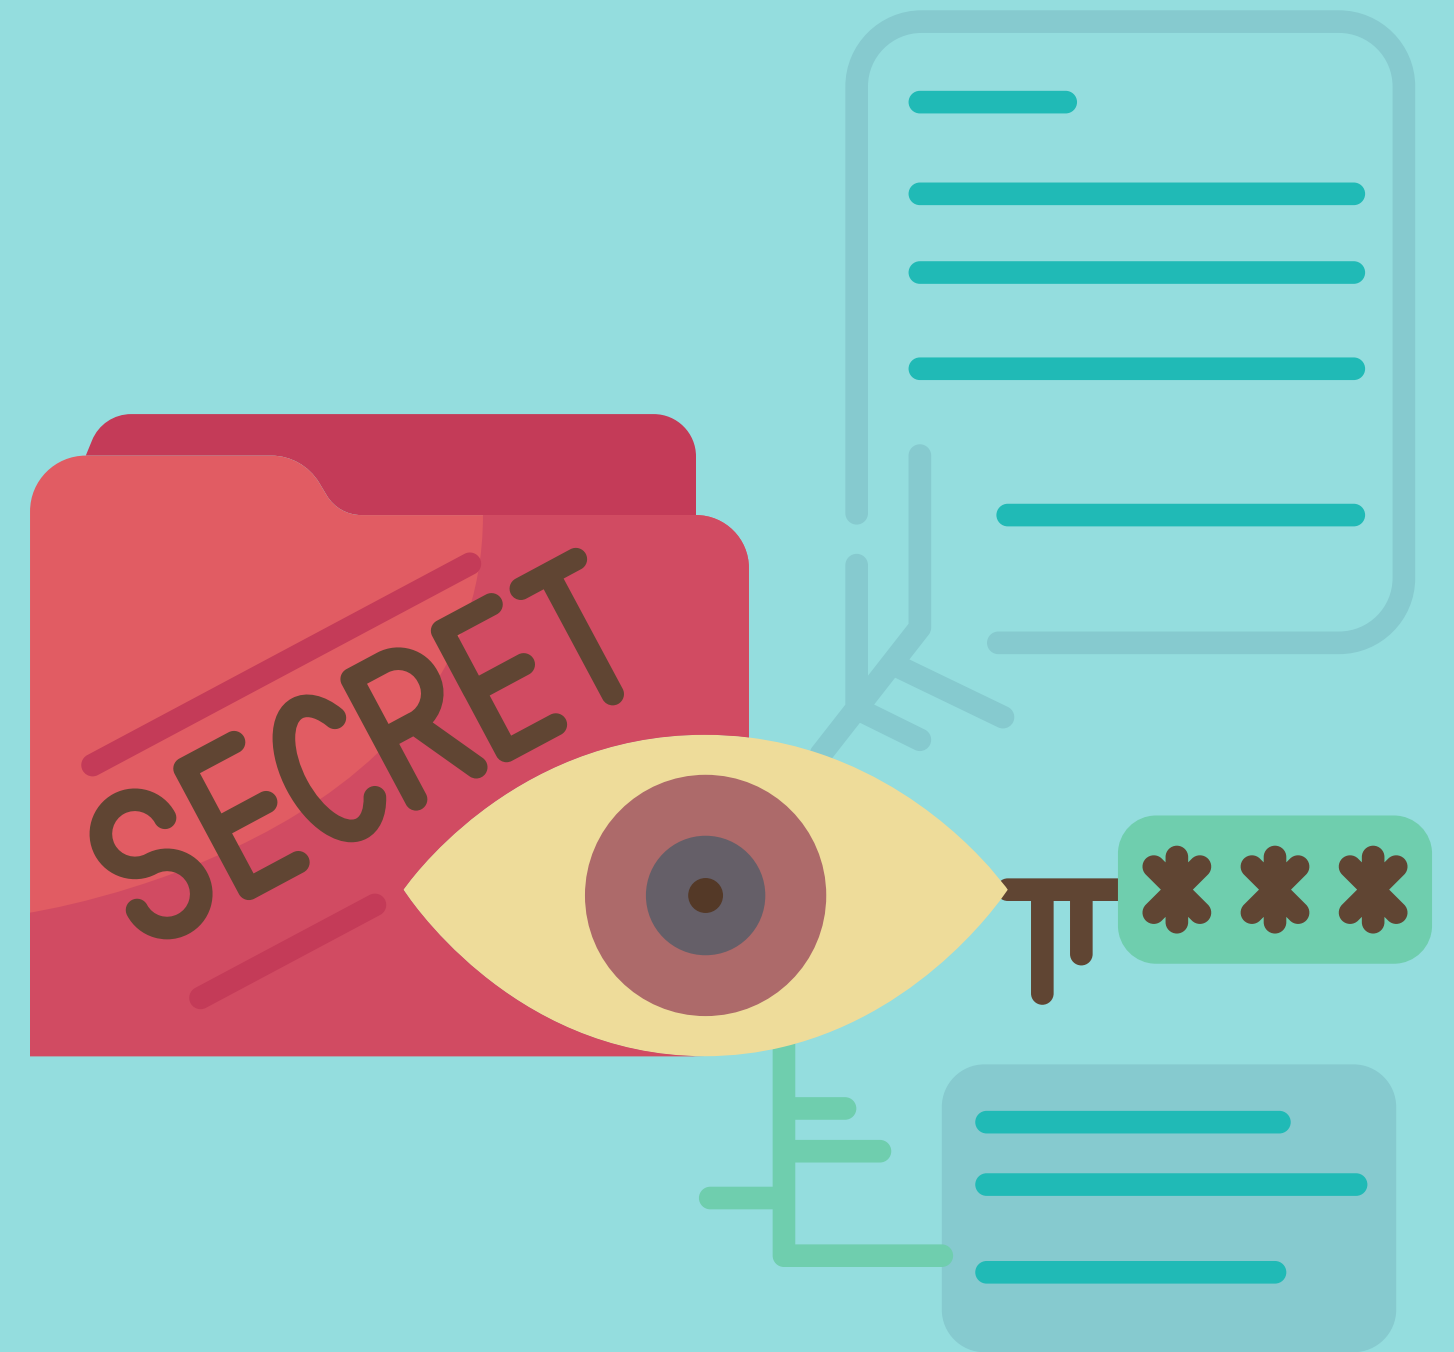

APPROACH

- User registers in the application
- After that users can sign in to their newly created account
- They just have to remember the master password

APPROACH

- After successful login, users can add all their username and passwords
- Everything will be stored in the database

SOFTWARE USED:

- ECLIPSE IDE
- MYSQL DATABASE

LANGUAGES USED:

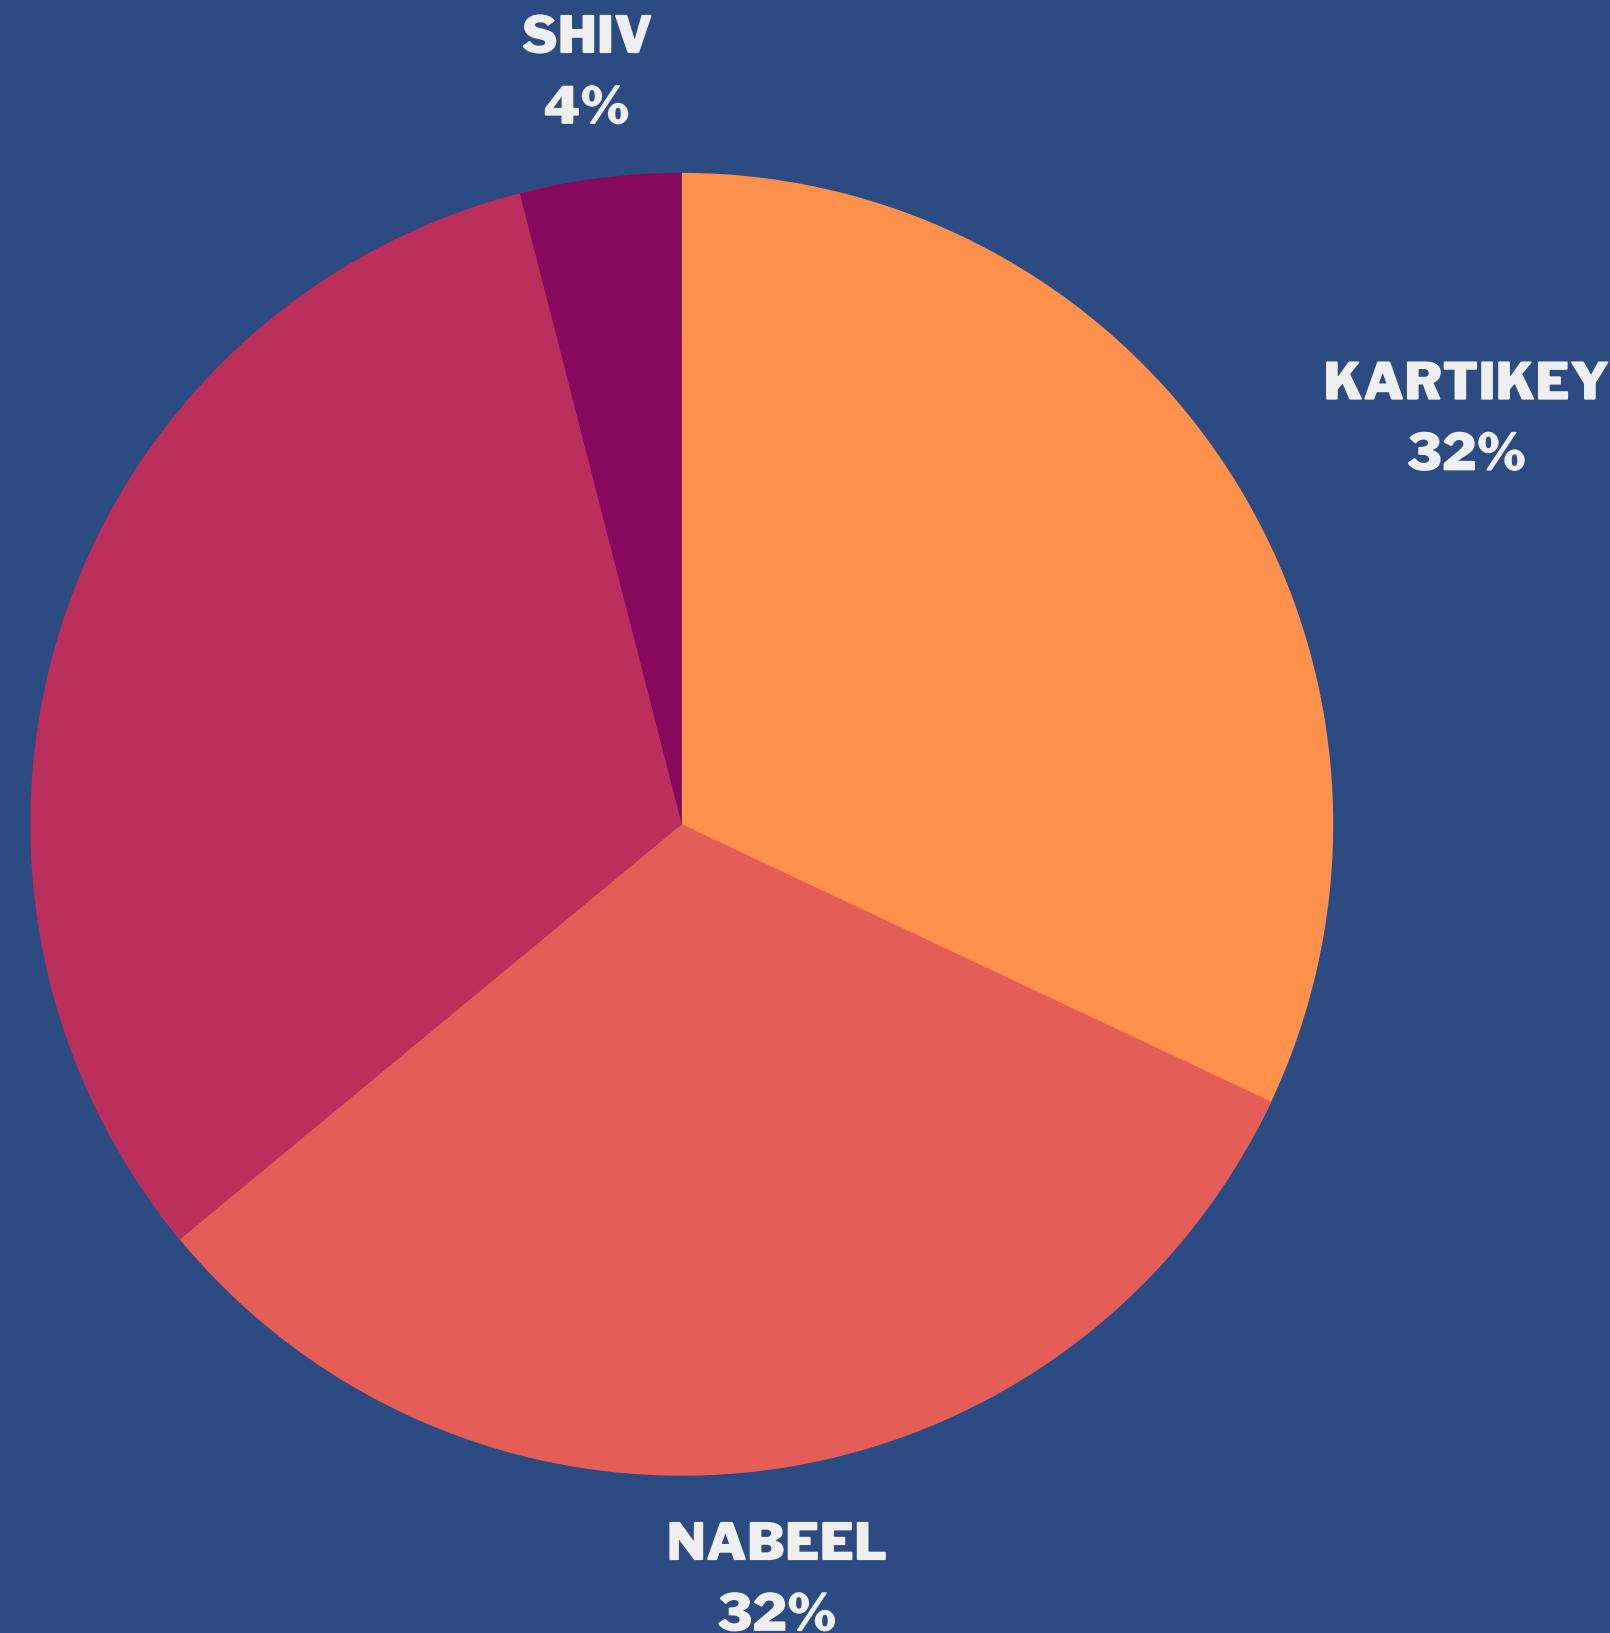

- JAVA
- SQL

INDIVIDUAL CONTRIBUTUTION
